

DYLAN NGUYEN

Irvine, CA | hello@dylanhnnguyen.com | 949-842-2889 | www.dylanhnnguyen.com

OBJECTIVE

Seeking a developer position to leverage my experience in AI and SaaS solution development, with a strong background in software engineering.

EDUCATION

University of California, Riverside

Riverside, CA

Bachelor of Science in Computer Science

2021 - 2024

- **Relevant Coursework:** Software Construction, Data Structures & Algorithms, Intro to AI, Computer Security, Operating Systems

EXPERIENCE

Full Stack Web Developer Intern

Irvine, CA

Trinet Internet Solutions

6/2023 - 8/2023

- Led the redevelopment of an internal tracking system, improving save/load time by 20%
- Engineered backend data structures and schemas, optimizing for cost-effective deployment
- Enhanced website performance, increasing user traffic by 24% and SEO ranking by 15% through server-side caching (Memcached, Redis)

Information Security Analyst Intern

Long Beach, CA

Farmers & Merchants Bank

3/2022 - 3/2023

- Assisted development of technical network diagrams of security infrastructure
- Managed database security and conducted vulnerability assessments with penetration testing
- Utilized Sumo Logic, Netwrix, Hitachi, ZenDesk, and internal IAM/SEIM/Active Directory systems

Information Technology Tutor

Irvine, CA

Irvine Lakeview Center

10/2017 - 6/2019

- Resolved technology-related issues and provided technical support.
- Created individualized technology assessments and education plans.

PROJECTS

DEVGPT | AI SaaS with Generative Tools

- Developed an AI-driven SaaS application using GPT-4 for autonomous query responses
- Features AI-generated code, chat, music, scanner tools and payment tokenization

002PICKLE | Full Stack E-commerce Shop + CMS

- Developed a customizable backend server with CMS for inventory and API management.
- Implemented user authentication, dynamic cart, live search, and Stripe payment integration.

HIGHLANDERNOW | Academic Platform

- Managed a platform serving over 400 users monthly with 200+ UCR user registrations.
- Developed authenticated login, interactive map, live parking status, and user submitted review database

SKILLS

- **Languages/Framework:** C#/C++, Java, Javascript (React, Next.js, Vue, TypeScript, Angular), Python (BS4, TensorFlow, Flask), HTML, CSS, Node, Express, MySQL/SQLite, PHP
- **Technologies:** REST CRUD API, MongoDB, Sanity, AWS, Firebase, Shopify, Wordpress/Woocommerce, Git
- **Certifications:** Sumo Logic Fundamentals Certified, IBM Full Stack Software Developer Professional
